Madison Energy Anti-Sweat Heater Controls provide a means to reduce energy by up to 80% by modulating the Anti-Sweat Heaters with sensor based technology so that they only operate when needed. Realize dramatic energy savings in your reach-in refrigeration systems. The built-in programmed maintenance cycle (PMC) technology assures that all display cases remain sweat, frost and ice free.

- Guaranteed to Reduce Energy Costs Up to 80%
- Display Cases Remain Sweat, Frost & Ice Free
- Installation is Simple
- Less Than 12 Month ROI
- Prescriptive Rebates Available in Most Areas
- Components Exceed UL Standards
