

# Energy Auto Switching

**WE'LL MANAGE YOUR ENERGY BILL SO YOU CAN SAVE BIG.  
SAVE MONEY TODAY & ALWAYS.**

## AutoPilot

### WHAT IS THE PROCESS?

**AutoPilot is smart technology with a relentless customer focus.**

We work for you. Our system acts like the smartest retail energy customer in the market, but with the benefits of scale by being with tens of thousands of other customers.

#### Monitor the market

We keep a close watch on rates and trends.

#### Research the plans

We analyze available plans, looking for, and often negotiating, the best value for you!

#### Select and enroll

Once we find or negotiate the right plan for you, your enrollment is automatic!

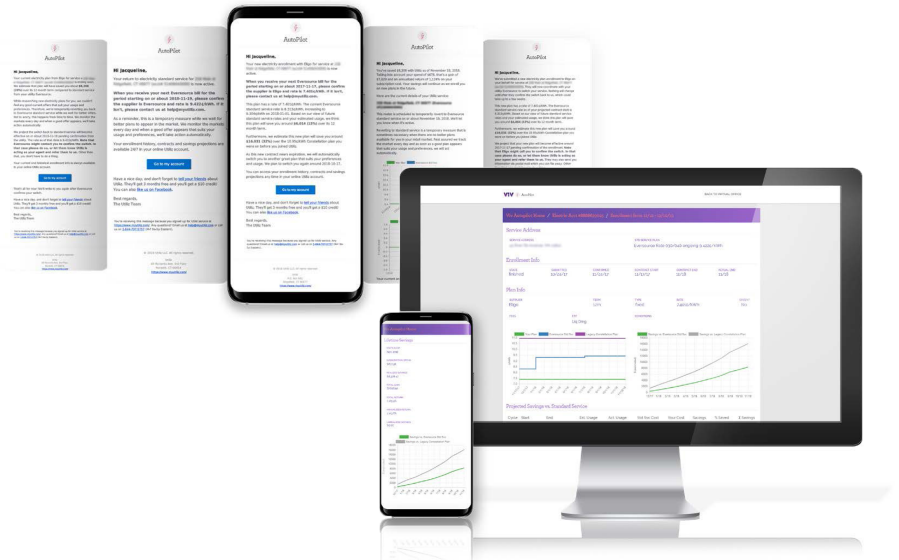

#### Switch or renew

We evaluate your plan at your renewal date and ensure you're still saving or switch you if not!

#### Responsible choice

We offset 50% of our customers' carbon emissions with RECs or carbon offsets - at no extra charge!

**AutoPilot keeps its customers updated every step of the way with reports, emails and an online account which shows savings, spend, contract details and more.**

**Energy costs can range up to 15% of a business's operating expenses.** That's a significant cost to your business. Doing business in a deregulated energy market comes with a choice, but that choice includes hours of research and new and unforeseen responsibilities that are often inefficient and ineffective. We remove this stress and handle your electricity supplier switching for you, ensuring you save on an annual basis.

**There's no risk to you. Pay nothing unless we can save you money.**
