# **EnerG<sup>2</sup>**

Reduce energy consumption and compressor cycles in your walk-in coolers and freezers with EnerG<sup>2</sup>.

Our patent-pending technology provides a more accurate means of temperature measurement through a specialized gel compound that simulates the food product temperature instead of the air temperature, which fluctuates with more volatility. It retrofits to the existing thermostat air probe and requires no additional maintenance.

- Guaranteed to Reduce Energy Costs 15% - 30%
- Reduces Compressor Cycles by 40% - 60%
- Extends Life of Equipment
- 12 Month ROI
- Reduced CO2 Emissions—Go Green!
- Lifetime Warranty

I am very happy with the energy savings I've seen from installing the EnerG2 device in my walk-ins and would recommend it. —JOEL, MCDONALD'S OWNER

You will be hard pressed to find another energy saving product this affordable, easy to install and with as quick of an ROI. Amazing job! —CALVIN, 42 ST. BISTRO
