Phone

Waste Management

**Number of Bills Assessed:**

3

**Number of Bills**

**Successfully Lowered:**

2

**AutoPilot Bill Negotiation finds more than \$12,000 in savings for a Maryland restaurant property management company.**

**Millions of businesses overpay on their monthly expenses, including phone, cable, internet, satellite, security and more. HN Alex Inc took action to lower these expenses by working with Viv. We assessed their monthly bills, identified the areas they were overpaying and went to work negotiating on their behalf with their providers. Now they are putting more money directly back into their business!**

### HOW IT WORKS

Simply upload your bills and let our expert bill negotiation team go to work to lower them. You pay nothing unless we can save you money. If we find savings, we will split the difference with you 50/50 over time as you realize the savings, or you can choose our one-time payment options and save even more. Your savings could come in the form of upfront savings or credits, or long-term monthly savings.

### THE BENEFITS

Just like you hire experts for many other areas of your business, hiring the team of experts at Viv to manage your bills is one of the smartest moves you can make and the easiest way to ensure you are never overspending again. When you let AutoPilot manage your bills, we negotiate on your behalf and we will keep negotiating when the term has ended. Even if we don't find savings for you, you can rest assured that you are getting a great deal already and you'll owe us nothing! What's more is our team will look to see if you are being charged for services or devices that you either don't need or aren't currently using.

**We make sure you keep your critical services at the best rate possible for as long as you keep AutoPilot.**

### CONTACT:

\*Savings vary depending on region and market dynamics. Your actual savings may be higher or lower than any examples or estimates shown, but your satisfaction is guaranteed.
